## 1 Introduction

Radxa Zero2 is a Single Board Computer (SBC) in an ultra-tiny form factor that offers high performance while leveraging outstanding mechanical compatibility. The Radxa Zero2 offers makers, IoT enthusiasts, hobbyists, PC DIY enthusiasts and others a reliable and extremely capable platform for building and tinkering their ideas into reality.

## 2 Features

### 2.1 Hardware

- Amlogic A311D with Quad core Cortex-A73 (ARM v8) 64-bit SoC @ 2.2GHz and Dual core Cortex-A53 (ARM v8) 64-bit SoC @ 1.8GHz
- ARM G52 MP4 GPU, supporting OpenGL ES 3.2, Vulkan 1.0, and OpenCL 2.0.
- 4GB LPDDR4
- 32GB/64GB/128GB high performance eMMC
- WiFi5/BT5 with external antenna
- 4K display via micro HDMI
- H.265/VP9 (HEVC) hardware decode (up to 4Kp60)
- H.264 hardware decode (up to 4Kp60)

### 2.2 Interfaces

- 1x micro SD Card
- 1x micro HDMI ports supporting displays up to 4Kp60 resolution
- 1x USB2 type C OTG port for power and data
- 1x USB3 type C HOST port
- 1x MIPI CSI
- 1x MIPI DSI
- 40x user GPIO supporting various interface options:
  - 3 x UART
  - 2 x SPI bus
  - 3 x I2C bus
  - 3 x PWM
  - 2 x ADC
  - up to 22 x GPIO
  - 2 x 5V DC power in
  - 2 x 3.3V power pin

### 2.3 Software

- ARMv8 Instruction Set
- Debian/Ubuntu Linux support

- Android 9 support
- Hardware access/control library for Linux/Android

## 3 Electrical Specification

### 3.1 Power Requirements

The Radxa Zero2 support DC +5V voltage:

- Power adapter with 5V/3A on the USB C power port without LCD, 5V/4A with LCD.
- 5V Power from the GPIO PIN 2 & 4

## 4 Peripherals

### 4.1 GPIO Interface

Radxa Zero2 offers a 40P GPIO expansion header which provides extensive compatibility with a wide range of accessories developed for the SBC market.

#### 4.1.1 GPIO Alternate Functions

## 4.2 USB

The Radxa Zero2 has 1x USB3 HOST in type-C socket. Downstream USB current is limited to approximately 1A. The Radxa Zero2 also has 1x USB2 OTG in type-C socket, which can be powered by 5V PSU or PC/Laptop USB port with data access.

## 4.3 HDMI

The Radxa Zero2 has 1x HDMI port in type D socket, which support CEC and HDMI 2.0 with resolutions up to 4Kp60.

## 4.4 Temperature Range and Thermals

The recommended ambient operating temperature range is 0°C to 50°C.

To reduce thermal output when idling or under light load, the Radxa Zero2 reduces the CPU clock speed and voltage. During heavier load the speed and voltage (and hence thermal output) are increased. The internal governor will throttle back both the CPU speed and voltage to make sure the CPU temperature never exceeds 85 degrees C.

The Radxa Zero2 will operate perfectly well without any extra cooling and is designed for sprint performance - expecting a light use case on average and ramping up the CPU speed when needed (e.g. when loading a webpage). If a user wishes to load the system continually or operate it at a high temperature at full performance, further cooling may be needed.

## 5 Availability

Radxa guarantees availability of the Radxa Zero2 until at least September 2029.

## 6 Support

For support please see the hardware documentation section of the [Radxa Wiki](#) website and post questions to the [Radxa forum](#).
